The Crossrail Place Roof Garden provides good foraging opportunities for the bees.

Stickleback is a protected plant species listed on schedule 8 of the Wildlife and Countryside Act, 1981 (as amended), was noted on the sedum roof on 15 Canada Square.

Sammy the Seal
Sex if you can spot Sammy the Seal in the water. A little hint: he likes to be close to the Billingsgate Market where he can get some free lunch!

New aquatic ecological features will be installed at our new district, Wood Wharf. These will include reed beds, tern rafts and even some ecological islands to the East of the plot.

A number of house sparrow boxes will be installed in the parks of the new district. Over the past decades, house sparrow populations have been in decline in the UK and particularly in London. Sparrow boxes are easy to make and can be installed in back gardens or house walls so why not visit the RSPB website to see how you can make your own box? rspb.org.uk

The planting in the Crossrail Place Roof Garden evokes the rich heritage of the London Docklands and the species of plants were chosen to depict the various supply routes of goods that arrived in the West India Dock. Here, you can find two geographic zones: in the Western hemisphere of the garden are tree ferns from Australia, New Zealand, USA and Mexico and in the Eastern hemisphere are different kinds of bamboo from Japan and China, as well as Japanese Maples.

WESTFERRY CIRCUS
This is the oldest park on Canary Wharf Estate. Here you will find a variety of interesting trees and shrubs including English Oak, Red Oak, Magnolia Kobus, Yuccia with Hazel and many other species.

CABOT SQUARE FOUNTAINS
There’s more than meets the eye in this concrete space. Look around the edges and you will find birds taking shade amongst the trees whilst watching the world go by!

JUBILEE PARK
Take a walk through our biggest park which has over 200 very rare deciduous Dawn Redwood trees. The large ponds form the centrepiece of Jubilee Park, containing a number of fish and serving as a summer watering hole for ducks and birds - see if you can spot our resident Wagtails curiously peaking into the water!

The Crossrail Place Roof Garden is a protected plant species. Jersey Cudweed (Gnaphalium luteoalbum), a protected plant species listed on schedule 8 of the Wildlife and Countryside Act, 1981 (as amended), was noted on the sedum roof on 15 Canada Square.
